## OBJECTIVE

---

Obtain a **full time** employment as a **frontend Engineer** aiming professional and personal development.

## ABOUT

---

As a front-end-focused web developer, I specialize in **UI/UX** design, **Javascript**, **React**, HTML, and CSS. My passion is creating beautiful and intuitive designs and bringing them to life. I have experience working with both big and small companies, and as a startup developer, I learned to be versatile and wear multiple hats. I have a strong learning ability and a positive attitude, always excited to take on new challenges and expand my skill set.
